

Robert Pietrzak

Junior Software / Field Engineer
407-937-9538
robpietrzak97@gmail.com
robpietrzak.com
linkedin.com/in/robpietrzak

ABILITIES

Hardware diagnostics & troubleshooting
Linux (multi-distro) & multi-OS
Python & Bash scripting
Networking fundamentals (TCP/IP)
Customer-facing technical support
Strong technical communication
Agile / Scrum methodologies
Cross-functional collaboration
AI / ML fundamentals
Code review & documentation
Data center hardware awareness
Eagerness to learn

TECHNOLOGIES

Python · C++ · C# · Bash · Java
Git & GitHub
Linux / Ubuntu · WSL
WireGuard (VPN)
Jira (docs & tracking)
Claude (AI-assisted dev)
Postman · REST APIs
PyCharm 2025
Microsoft O365

EDUCATION

University of Central Florida
BA — Digital Media: Game Design

Seminole State College
AA

CERTIFICATIONS

CompTIA A+
Google AI Essentials
IBM Intro to Software Engineering

INDEPENDENT STUDY

AWS Skill Builder
Cloud Practitioner Track

SUMMARY

Hardware-fluent junior engineer with 5+ years repairing and diagnosing complex electronics, strong Linux, Python, and scripting skills, and hands-on experience delivering customer-facing technical support. Comfortable across Windows, WSL, and Linux environments. Experienced with GPU hardware, AI-assisted development using Claude, cross-team Jira workflows, and secure networking via WireGuard. Passionate about GPU technology, AI computing infrastructure, and field-level technical problem-solving.

EXPERIENCE

Technical Specialist / Sound Designer

KiwiClockwork Studios · Aug 2023 – May 2024

- › Served as embedded technical specialist diagnosing real-time performance issues across Windows and Linux game engine environments
- › Used Jira for issue tracking, sprint planning, and cross-team documentation throughout the development lifecycle
- › Collaborated with programmers to resolve hardware-software integration issues and optimize runtime behavior
- › Fine-tuned audio attenuation systems requiring deep familiarity with engine APIs and platform-level configuration
- › Beta-tested pre-release builds; documented and reproduced failure cases for engineering team review

Repair Specialist & Technical Advisor

Electronic Wizard · Aug 2016 – Jun 2021

- › Diagnosed and repaired a broad range of consumer and commercial electronics including GPUs, motherboards, and storage devices
- › Provided hands-on customer technical support, translating complex hardware issues into clear, actionable solutions
- › Maintained and audited inventory database ensuring accurate part availability and procurement accuracy
- › Procured specialized components and coordinated with vendors, developing hardware supply chain awareness

Inventory & Operations

Lowe's Foods · Dec 2024 – Present

- › Managed real-time inventory using handheld scanning systems; conducted daily audits ensuring data integrity and reducing stock placement errors

PROJECTS

Turmoil · Gambit · Cataclysm

Game Programmer / Designer · robpietrzak.com

- › Engineered three original games from concept to release; authored C++ and C# game logic, physics systems, and input handling
- › Leveraged Claude for AI-assisted development — rapid prototyping, debugging, and iterating on complex game systems
- › Built and tested across Windows and WSL environments; used WireGuard for secure remote development and collaboration sessions
- › Profiled and optimized GPU/CPU rendering pipelines, identifying bottlenecks to consistently hit performance targets
- › Managed version control, build notes, and release documentation via Git and GitHub in collaborative team settings
